

# PACEP II

“**Support to Parliament and Civil Society**” (*PACEP II*) is a project of the Swiss Development Cooperation, implemented by Global Partners Governance in Albania, aimed at strengthening the national oversight ecosystem. This four-year project (2024-2028) is part of a broader effort to support Albania’s democratic development and integration into the European Union.

The PACEP II implementation focuses on the following aspects:

## STRENGTHENING THE OVERSIGHT ECOSYSTEM IN ALBANIA

The project aims to enhance the effectiveness of parliamentary oversight by simultaneously supporting all key actors: (i) the Assembly, (ii) independent oversight institutions, and (iii) civil society organizations through capacity building initiatives, and by creating opportunities and incentives for collaboration.

### THE ASSEMBLY

#### Enhancing Parliamentary Procedures and Administration:

The project will work directly with Parliamentary Committees and administrative staff to improve efficiency, planning, and analytical functions, leading to more robust and evidence-informed oversight processes.

### OVERSIGHT INSTITUTIONS

#### Empowering Independent Oversight Institutions:

The project aims to enhance the ability of independent oversight institutions to provide actionable recommendations and drive accountability by supporting the development of high-quality reporting standards and building staff capacities.

### CIVIL SOCIETY

#### Amplifying Civil Society's Voice:

The project seeks to increase civil society's meaningful participation in legislative and oversight processes through targeted capacity building and the creation of engagement platforms, thus ensuring that citizens' concerns are effectively represented.

## FOSTERING COLLABORATION FOR IMPACT

Recognizing the importance of collaboration among key stakeholders for an effective oversight process, the project seeks to implement innovative, integrated practices that enhance cooperation and information exchange among the Assembly, independent oversight institutions, and civil society organizations, for achieving measurable improvements in the impact of oversight activities.
